CONSTITUTION: The purpose urethane-modified acrylate composition is obtained by mixing a urethane-modified acrylate (A) of formula I (wherein R₁ and R₁' are each H or methyl, R₂ and R₂' are each a polyalcohol, R₃ is an organic diisocyanate, R₄ is a polyester polyol having groups of formulas II and III as structural components, m is 1W5 and l and n are each 1W3) with a polymerizable monomer (B) (e.g., styrene or methyl methacrylate). Component A is produced by using a polyester polyol, an organic diisocyanate (e.g., tolylene diisocyanate) and a hydroxyl group-containing (meth)acrylate (e.g., 2-hydroxyethyl acrylate) as starting materials.
